

Romania, Spices

Pacovis AG is one of the leading suppliers in Switzerland of additives, spices, enzymes, cultures, packaging and consumable materials for food processing operations. The company was formed in 1997 by the merger of Pakoba (founded 1935) and MüllerWeder (founded 1976). Pacovis has been selling food additives and spices on the Romanian market through its partner S.C. Almecar S.R.L. for several years.

As sales increased steadily and the partners proved to be reliable, Pacovis decided to set up a production facility in Tirgu-Mures, Romania. By doing so the company can reduce labor costs and import duties as well as gain a competitive advantage this marketplace. The venture will have a positive economic impact. New jobs will be created and there will be a transfer of technological know-how in spice and additive production methods.

Pacovis received a credit from the SECO Start-up Fund to finance building construction and equipment in the start-up phase of the project.
