ChemChem Safari Lodge

Tanzania

A young couple developed a concept of a relaxed approach to photo safaris in the immense savannas of Serengeti National Park and Tarangire National Park.

Together with private persons as co-investors they set up an eight tent lodge with a thoughtfully designed infrastructure (swimming pool, spa, dining room, etc.) just outside the National Park.

Moreover two semi-permanent tented camps change location depending on the migration of wildlife so that visitors can enjoy the best of bush life with comfort.
